types of plastic surgery. The procedure involves nasal cartilage and nasal bone reshaping to improve functionality, create a more aesthetic nose, or both.

Rhinoplasty - Aesthetics and Plastic Surgery

A rhinoplasty can be done in a variety of ways with different types of incisions. Your plastic surgeon will perform a careful evaluation of your entire face including your chin and mid-face, and suggest which procedure is best for you. The surgeon will show you where the incisions will be made. A rhinoplasty has three main components:

Orthognathic surgery and rhinoplasty. Although it is well-understood that the lower two-thirds of the craniofacial skeleton significantly define one's facial appearance, the jaws and the nose are frequently treated as separate entities. This new book skillfully treats the jaws and nose as essential to combine in analysis and execution.
