Although the original inspiration for the development of Coh-Metrix was to provide automated metrics of text cohesion (hence Coh-Metrix), it became clear very early in the Coh-Metrix project that there was a need in the research community for a more comprehensive tool capable of analyzing texts at multiple language and discourse levels. The Coh-Metrix team has collected and evaluated hundreds of indices since the beginning of the project.

Abstract. Answer sheet evaluation is a time-consuming task that requires lot of efforts by the teachers and hence there is a strong need of automation for the same. This paper proposes a machine learning based approach that relies on WordNet graphs for finding out the text similarity between the answer provided by the student and the ideal answer provided by the teacher to facilitate the automation of answer sheet evaluation.
