High Resolution CCD Weatherproof Night Vision Color Camera ...

Essential Overview of CCD Spatial Resolution. The resolution of a CCD is a function of the number of pixels and their size relative to the projected image. CCD arrays of over 1,000 x 1,000 sensors (1 Mega-pixel) are now commonplace in scientific cameras. The trend in cameras is for the sensor size to decrease, and cameras with pixels as small as 4 x 4 microns are currently available in the consumer market.

Essential Overview of CCD Spatial Resolution - Andor ...

HiRISE was designed to be a high resolution camera from the beginning. It consists of a large mirror, as well as a large CCD camera. Because of this, it achieves a resolution of 1 microradian, or 0.3 meter at a height of 300 km.

HiRISE - Wikipedia

A charge-coupled device (CCD) is an integrated circuit containing an array of linked, or coupled, capacitors.Under the control of an external circuit, each capacitor can transfer its electric charge to a neighboring capacitor. CCD sensors are a major technology used in digital imaging.. In a CCD image sensor, pixels are represented by p-doped metal-oxide-semiconductor (MOS) capacitors.

Charge-coupled device - Wikipedia
