Operators Manuals | Lincoln Electric
So if you are welding 12 gauge mild steel with a thickness of 0.100", you would set the machine at 100 amps. Wire Size & Amperage Range: Each wire size offers a substantial operating range and overlap considerably. This may help you standardize on one or 2 wire sizes for most of your work.

MIG Welder Settings for Various Metal Thickness's
Somewhat confusingly, there are two types of flux wire: gas-shielded flux core wire (which still needs a gas supply as above) and self-shielded flux core wire (in which the flux burns, releasing its own protective gas). The latter is by far the more popular type; it's commonly called "gasless" in order to differentiate it from "gas."

5 Best MIG Welders - Oct. 2020 - BestReviews
Item Description: Translate description Century Cordless Century 131 gasless wire feed welder, 130 amp, rechargeable with charging cord. This does not seem to charge up all the way and may need a new battery.
