This concise sourcebook takes the guesswork out of locating the best sources of data, a process more important than ever as the data landscape grows increasingly cluttered. Much of the most frequently used data can be found free online, and this book shows readers how to look for it with the assistance of user-friendly tools. This thoroughly annotated guide will be a boon to library staff at public libraries, high school libraries, academic libraries, and other research institutions, with concentrated coverage of Data sources for frequently researched subjects such as agriculture, the earth sciences, economics, energy, political science, transportation, and many more The basics of data reference along with an overview of the most useful sources, focusing on free online sources of reliable statistics like government agencies and NGOs Statistical datasets, and how to understand and make use of them How to use article databases, WorldCat, and subject experts to find data Methods for citing data Survey Documentation and Analysis (SDA) software This guide cuts through the data jargon to help librarians and researchers find exactly what they're looking for.

Thanks to remarkable advances in modern health care attributable to science, engineering, and medicine, it is now possible to cure or manage illnesses that were long deemed untreatable. At the same time, however, the United States is facing the vexing challenge of a seemingly uncontrolled rise in the cost of health care. Total medical expenditures are rapidly approaching 20 percent of the gross domestic product and are crowding out other priorities of national importance. The use of increasingly expensive prescription drugs is a significant part of this problem, making the cost of biopharmaceuticals a serious national concern with broad political implications. Especially with the highly visible and very large price increases for prescription drugs that have occurred in recent years, finding a way to make prescription medicines à € "and health care at large à € "more affordable for everyone has become a socioeconomic imperative. Affordability is a complex function of factors, including not just the prices of the drugs themselves, but also the details of an individual's insurance coverage and the number of medical conditions that an individual or family confronts. Therefore, any solution to the affordability issue will require considering all of these factors together. The current high and increasing costs of prescription drugs à € "coupled with the broader trends in overall health care costs à € "is unsustainable to society as a whole. Making Medicines Affordable examines patient access to affordable and effective therapies, with emphasis on drug pricing, inflation in the cost of drugs, and insurance design. This report explores structural and policy factors influencing drug pricing, drug access programs, the emerging role of comparative effectiveness assessments in payment policies, changing finances of medical practice with regard to drug costs and reimbursement, and measures to prevent drug shortages and foster continued innovation in drug development. It makes recommendations for policy actions that could address drug price trends, improve patient access to affordable and effective treatments, and encourage innovations that address significant needs in health care.

In its landmark report, Health Literacy: A Prescription to End Confusion, the Institute of Medicine noted that there are 90 million adults in the United States with limited health literacy who cannot fully benefit from what the health and health care systems have to offer. Since the release of that report, health literacy has become a vibrant research field that has developed and disseminated a wide range of tools and practices that have helped organizations, ranging in size from large health care systems to individual health care providers and pharmacists, to engage in health literate discussions with and provide health literate materials for patients and family members. Improving the health literacy of organizations can be an important component of addressing the social determinants of health and achieving the triple aim of the patient experience, improving the health of populations, and reducing the cost of care. However, the focus on organizations does not address the larger issue of how to improve health literacy across the U.S. population. To get a better understanding of the state of community-based health literacy interventions, the Roundtable on Health Literacy hosted a workshop on July 19, 2017 on community-based health literacy interventions. It featured examples of community-based health literacy programs, discussions on how to evaluate such programs, and the actions the field can take to embrace this larger view of health literacy. This publication summarizes the presentations and discussions from the workshop.

This publication shows designated first-aid providers how to diagnose, treat, and prevent the health problems of seafarers on board ship. This edition contains fully updated recommendations aimed to promote and protect the health of seafarers, and is consistent with the latest revisions of both the WHO Model List of Essential Medicines and the International Health Regulations. --Publisher's description.

This review manual prepares students to successfully pass the ANCC Psychiatric-Mental Health Nurse Practitioner board certification examination. It encompasses all of the essential knowledge required, uses a succinct outline format that highlights critical detail, and systematically follows the test blueprint so that those taking the exam will be optimally prepared. The Psychiatric-Mental Health Nurse Practitioner Certification Review Manual begins with an overview of the certification examination, self-care, and test tips; the role of the psychiatric-mental health nurse practitioner, scope of practice, and regulations; and the theoretical foundations of care. Other topics examined include the neuroanatomy and physiology of mental illness, psychopharmacology; and physical assessment, diagnostic tests, and differential diagnosis. A wide range of psychiatric disorders, as organized in the DSM-5, are also reviewed. Each of the chapters include learning objectives and end-of-chapter review questions. The review manual concludes with a 150-question practice test. KEY FEATURES Reflects the latest ANCC test blueprint Includes test-taking strategies and tips for preparing for the big day; scope of practice; and theoretical foundations of care Covers a wide range of psychiatric disorders, as organized in the DSM-5 Includes end-of-chapter review questions and rationales PLUS a valuable 150-question practice test with rationales—more than 400 questions in total

The U.S. Social Security Administration (SSA) provides benefits to disabled adults and children, offering vital financial support to more than 19 million disabled Americans. Of that group, approximately 5.5 million have been deemed à € " by virtue of youth or mental or physical impairment - incapable of managing or directing the management of their benefits. Hence, a representative payee has been appointed to receive and disburse SSA payments for these beneficiaries to ensure that their basic needs for shelter, food, and clothing are met. Periodically, however, concerns have been expressed about the accuracy of the process by which SSA determines whether beneficiaries are capable of managing their benefits, with some evidence suggesting that underdetection of incapable recipients may be a particular problem. The importance of creating a process as possible for incapability determinations is underscored by the consequences of incorrectly identifying recipients either as incapable when they can manage their benefits or as capable when they cannot. Failure to identify beneficiaries who are incapable of managing their funds means abandoning a vulnerable population to potential homelessness, hunger, and disease. Informing Social Security's Process for Financial Capability Determination considers capability determination processes used by other similar benefit programs, abilities required to manage, and direct the management of, benefits, and effective methods and measures for assessing capability. This report evaluates SSA's capability determination process for adult beneficiaries and provides recommendations for improving the accuracy and efficiency of the agency's policy and procedures for making these determinations.

Read this million-copy bestseller for leadership insights about top-down change to improve productivity in your business starting with the most important person: You. When Captain Abrashoff took over as commander of USS Benfold, it was like a business that had all the latest technology but only some of the productivity. Knowing that responsibility for improving performance rested with him, he realized he had to improve his own leadership skills before he could improve his ship. Within months, he created a crew of confident and inspired problem-solvers eager to take the initiative and responsibility for their actions. The slogan on board became "It's your ship," and Benfold was soon recognized far and wide as a model of naval efficiency. How did Abrashoff do it? Against the backdrop of today's United States Navy, Abrashoff shares his secrets of successful management including: See the ship through the eyes of the crew. By soliciting a sailor's suggestions, Abrashoff drastically reduced tedious chores that provided little additional value. Communicate, communicate, communicate: The more Abrashoff communicated the plan, the better the crew's performance. His crew eventually started calling him "Megaphone Mike," since they heard from him so often. Create discipline by focusing on purpose: Discipline skyrocketed when Abrashoff's crew believed that what they were doing was important. Listen aggressively: After learning that many sailors wanted to use the GI Bill, Abrashoff brought a test official aboard the ship—and held the SATs forty miles off the Iraqi coast. From achieving amazing cost savings to winning the highest gunnery score in the Pacific Fleet, Captain Abrashoff's extraordinary campaign sent shock waves through the U.S. Navy. It can help you change the course of your ship, no matter where your business battles are fought.

Section 1557 is the nondiscrimination provision of the Affordable Care Act (ACA). This brief guide explains Section 1557 in more detail and what your practice needs to do to meet the requirements of this federal law. Includes sample notices of nondiscrimination, as well as taglines translated for the top 15 languages by state.
