This hilarious and poignant #ownvoices tween debut about dealing with bullies, making friends, and the power of good books is a great next read for fans of Merci Suárez Changes Gears and John David Anderson. Ahmed Aziz is having an epic year!epically bad. After his dad gets sick, the family moves from Hawaii to Minnesota for his dad's treatment. Even though his dad grew up there, Ahmed can't imagine a worse place to live. He's one of the only brown kids in his school. And as a proud slacker, Ahmed doesn't want to deal with expectations from his new teachers. Ahmed surprises himself by actually reading the assigned books for his English class: Holes, Bridge to Terabithia, and From the Mixed-Up Files of Mrs. Basil E. Frankweiler. Shockingly, he doesn't hate them. Ahmed also starts learning about his uncle, who died before Ahmed was born. Getting bits and pieces of his family's history might be the one upside of the move, as his dad's health hangs in the balance and the school bully refuses to leave him alone. Will Ahmed ever warm to Minnesota?

What could a pampered house cat possibly have to complain about? This latest collaboration from picture book superstars--and cat devotees--Lane Smith and Jory John brings with it a hilarious set of feline problems! Just like most cats, this cat lives an extremely comfortable life. But he has his problems too! The sun spot he's trying to bathe in won't stop moving. He keeps getting served dry food instead of wet. And don't even get him started on the vacuum--it's an absolute menace!--and the nosy neighbor squirrel that just can't seem to mind its own business. Will this cat ever find the silver lining? Jory John and Lane Smith once again air their grievances in this must-have companion book to Penguin Problems and Giraffe Problems.

An introduction to a broad range of topics in deep learning, covering mathematical and conceptual background, deep learning techniques used in industry, and research perspectives. !Written by three experts in the field, Deep Learning is the only comprehensive book on the subject.!!Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX Deep learning is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. Deep Learning can be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. A website offers supplementary material for both readers and instructors.

Published annually since 1985, the Handbook series provides a compendium of thorough and integrative literature reviews on a diverse array of topics of interest to the higher education scholarly and policy communities. Each chapter provides a comprehensive review of research findings on a selected topic, critiques the research literature in terms of its conceptual and methodological rigor and sets forth an agenda for future research intended to advance knowledge on the chosen topic. The Handbook focuses on a comprehensive set of central areas of study in higher education that encompasses the salient dimensions of scholarly and policy inquiries undertaken in the international higher education community. Each annual volume contains chapters on such diverse topics as research on college students and faculty, organization and administration, curriculum and instruction, policy, diversity issues, economics and finance, history and philosophy, community colleges, advances in research methodology and more. The series is fortunate to have attracted annual contributions from distinguished scholars throughout the world.

The transition from President Donald J. Trump to President Joseph R. Biden Jr. stands as one of the most dangerous periods in American history. But as # 1 internationally bestselling author Bob Woodward and acclaimed reporter Robert Costa reveal for the first time, it was far more than just a domestic political crisis. Woodward and Costa interviewed more than 200 people at the center of the turmoil, resulting in more than 6,000 pages of transcripts!and a spellbinding and definitive portrait of a nation on the brink. This classic study of Washington takes readers deep inside the Trump White House, the Biden White House, the 2020 campaign, and the Pentagon and Congress, with vivid, eyewitness accounts of what really happened. Peril is supplemented throughout with never-before-seen material from secret orders, transcripts of confidential calls, diaries, emails, meeting notes and other personal and government records, making for an unparalleled history. It is also the first inside look at Biden's presidency as he faces the challenges of a lifetime: the continuing deadly pandemic and millions of Americans facing soul-crushing economic pain, all the while navigating a bitter and disabling partisan divide, a world rife with threats, and the hovering, dark shadow of the former president. !We have much to do in this winter of peril.!! Biden declared at his inauguration, an event marked by a nerve-wracking security alert and the threat of domestic terrorism. Peril is the extraordinary story of the end of one presidency and the beginning of another, and represents the culmination of Bob Woodward's news-making trilogy on the Trump presidency, along with Fear and Rage. And it is the beginning of a collaboration with fellow Washington Post reporter Robert Costa that will remind readers of Woodward's coverage, with Carl Bernstein, of President Richard M. Nixon's final days.
