

## Cfm56 2 Engine

Getting the books cfm56 2 engine now is not type of challenging means. You could not by yourself going with books accrual or library or borrowing from your links to log on them. This is an entirely simple means to specifically get lead by on-line. This online declaration cfm56 2 engine can be one of the options to accompany you like having additional time.

It will not waste your time. say yes me, the e-book will unconditionally manner you further issue to read. Just invest little get older to way in this on-line revelation cfm56 2 engine as competently as review them wherever you are now.

The CFM International CFM56 (U.S. military designation F108) series is a French-American family of high-bypass turbofan aircraft engines made by CFM International (CFMI), with a thrust range of 18,500 to 34,000 lbf (82 to 150 kN). CFMI is a 50 – 50 joint-owned company of Safran Aircraft Engines (formerly known as Snecma) of France, and GE Aviation (GE) of the United States.

[CFM International CFM56—Wikipedia](#)

The CFM56 was initially intended to replace older turbojet engines of the 89-kilonewton (20,000-pound) thrust class, and to provide quiet, efficient, and environmentally acceptable power for transport aircraft. Engines of this family are used on both civil and military aircraft. Civil types include Boeing 737s and Airbus Industrie A320s and A340s.

[CFM International CFM56-2 Turbofan Engine | National Air ...](#)

The CFM56 engine set the standard for single-aisle commercial jet engines. Owing its success to its exceptional reliability and performance, CFM56 was built on over four decades of experience and technological excellence. With more than 30,000 engines delivered to date, it powers more than 550 operators worldwide.

[CFM56—CFM International Jet Engines CFM International](#)

The first flight of a CFM International CFM56 two-shaft turbofan engine was made on Feb 16, 1977, installed in the first McDonnell Douglas YC-15 as part of the AMST development program.

[F108 / CFM56 Engine](#)

The CFM International CFM56 (U.S. military designation F108) series is a family of high-bypass turbofan aircraft engines made by CFM International (CFMI), with a thrust range of 18,000 to 34,000 pounds-force (80 to 150 kilonewtons). CFMI is a 50 – 50 joint-owned company of SNECMA, France and GE Aviation (GE), USA.

The CFM engines provide reduced take-off roll, more power and increased fuel efficiency. The CFM56-2A powers the U.S. Navy's E-6B Mercury airborne command post and communications relay aircraft and some non-U.S. Air Force E-3 Sentry AWACS aircraft.

[CFM International CFM56 \(F108\) Turbofan Engine | PowerWeb](#)

The CFM56-2 engine is the “ granddaddy ” of the CFM family of engines. It was the first high-bypass engine in the 10-ton class and forms the foundation for the rest of the CFM engines in service today. Its sturdy, efficient architecture has allowed CFM to become the most popular engine in the air.

[Legacy CFM Engines—CFM International Jet Engines CFM ...](#)

The CFM56-3 is a high bypass, dual rotor, axial flow turbofan engine. Basic engine specification are provided in Fig 1 and 2. The integrated fan and booster (low pressure turbine-LPC) is driven by a 4 stage low pressure turbine (LPT). A single stage high pressure turbine (HPT) drives the 9 stage high pressure compressor (HPC)

[CFM 56 Specific Operating Instructions—The Boeing 737 ...](#)

The CFM56-2 was the first member of the CFM56 family. It pioneered the medium-thrust high-bypass turbofan concept, and introduced the single-stage high-pressure turbine layout to reduce maintenance costs.
