Decoded is a 2002 novel by Mai Jia. It tells the story of a brilliant Chinese mathematician recruited to work as a cryptographer for his country. It is set primarily in the period surrounding World War II and the continuing turmoil in China following the war. It is Mai Jia's first novel, as well as his first book to be translated into English. The book was adapted into a 2016 TV series of the same name. In 2017, Jake Kerridge, writing in The Daily Telegraph, declared it to be one of "the 20 best

Decoded (novel) - Wikipedia

Mai Jia's debut novel Decoded may be many things, but it is not a spy novel. To some extent it is historical, but it really is a half-psychological, half-philosophical tale. If you expect some sort of cliff-hanger, some mystery in which it is revealed, in a stunning reversal at the end, that such and such character was always a behind-the ...

Decoded (Chinese TV series) - Wikipedia

One of the initial things that interested me about Decoded is that it is published by Allen Lane, something which is quite unusual as the imprint usually only publishes non-fiction, at first I thought it could have perhaps been a book that had strayed over from the popular science bays, looking further it also seems that another novel by Mai Jia, In the Dark, (which won Jia the Mao Dun ...

THIS EDITION HAS BEEN REPLACED BY A NEWER EDITION From about 1880 to World War I, sweeping changes in technology and culture created new modes of understanding and experiencing time and space. Stephen Kern writes about the onrush of technics that reshaped life concretely—telephone, electric lighting, steamship, skyscraper, bicycle, cinema, plane, x-ray, machine gun—and the cultural innovations that shattered older forms of art and thought—the stream-of-consciousness novel, psychoanalysis, Cubism, simultaneous poetry, relativity, and the introduction of world standard time. Kern interprets this generation's revolutionized sense of past, present, and future, and of form, distance, and direction. This overview includes such figures as Proust, Joyce, Mann, Wells, Gertrude Stein, Strindberg, Freud, Husserl, Apollinaire, Conrad, Picasso, and Einstein, as well as diverse sources of popular culture drawn from journals, newspapers, and magazines. It also treats new developments in personal and social relations including scientific management, assembly lines, urbanism, imperialism, and trench warfare. While exploring transformed spatial-temporal dimensions, the book focuses on the way new sensibilities subverted traditional values. Kern identifies a broad leveling of cultural hierarchies such as the Cubist breakdown of the conventional distinction between the prominent subject and the framing background, and he argues that these levelings parallel the challenge to aristocratic society, the rise of democracy, and the death of God. This entire reworking of time and space is shown finally to have influenced the conduct of diplomacy during the crisis of July 1914 and to have structured the Cubist war that followed.
