Provides a complete discography of all recordings made or issued on the Blue Note label from 1939 through 1999.

Rauch-Hindin discusses how artificial intelligence (AI) differs from traditional programs and the strategies and problems of bringing AI into an organization. She explains how systems with specialized problem-solving expertise work, and how to build one using AI application development tools. She also covers a number of real-world AI applications in industry, business and finance, science, medicine and engineering; AI programming languages; the different types of computer hardware that can run AI systems; and the underlying concepts and potential of state-of-the-art expert systems for automated programming. ISBN 0-13-368770-8 (pbk.): \$28.95.

INCLUDES AN EXTRACT FROM ORIGIN, THE NEW THRILLER BY DAN BROWN: OUT NOW

----- Harvard professor Robert Langdon receives an urgent late-night phone call while on business in Paris: the elderly curator of the Louvre has been brutally murdered inside the museum. Alongside the body, police have found a series of baffling codes. As Langdon and a gifted French cryptologist, Sophie Neveu, begin to sort through the bizarre riddles, they are stunned to find a trail that leads to the works of Leonardo Da Vinci - and suggests the answer to a mystery that stretches deep into the vault of history. Unless Langdon and Neveu can decipher the labyrinthine code and quickly assemble the pieces of the puzzle, a stunning historical truth will be lost forever...

This pioneering volume of essays explores the destruction of great libraries since ancient times and examines the intellectual, political and cultural consequences of loss. Fourteen original contributions, introduced by a major re-evaluative history of lost libraries, offer the first ever comparative discussion of the greatest catastrophes in book history from Mesopotamia and Alexandria to the dispersal of monastic and monarchical book collections, the Nazi destruction of Jewish libraries, and the recent horrifying pillage and burning of books in Tibet, Bosnia and Iraq.

The five volume set CCIS 224-228 constitutes the refereed proceedings of the International conference on Applied Informatics and Communication, ICAIC 2011, held in Xi'an, China in August 2011. The 446 revised papers presented were carefully reviewed and selected from numerous submissions. The papers cover a broad range of topics in computer science and interdisciplinary applications including control, hardware and software systems, neural computing, wireless networks, information systems, and image processing.
