This lecture describes a theoretical framework for the behavioural sciences that holds high promise for theory-driven research and design in Human-Computer Interaction. The framework is designed to tackle the adaptive, ecological, and bounded nature of human behaviour. It is designed to help scientists and practitioners reason about why people choose to behave as they do and to explain which strategies people choose in response to utility, ecology, and cognitive information processing mechanisms. A key idea is that people choose strategies so as to maximise utility given constraints. The framework is illustrated with a number of examples including pointing, multitasking, skim-reading, online purchasing, Signal Detection Theory and diagnosis, and the influence of reputation on purchasing decisions. Importantly, these examples span from perceptual/motor coordination, through cognition to social interaction. Finally, the lecture discusses the challenging idea that people seek to find optimal strategies and also discusses the implications for behavioral investigation in HCI.

When photographing people, you can have a great composition, perfect light, and the right camera settings, but if your subject doesn't look right—if the pose is off—the shot will not be a keeper. Posing is truly a crucial skill that photographers need to have in order to create great photographs. If you're looking to improve your ability to pose your subjects—whether they're men, women, couples, or groups—best-selling author and photographer Lindsay Adler's The Photographer's Guide to Posing: Techniques to Flatter Everyone is the perfect resource for you. In the first half of The Photographer's Guide to Posing, Lindsay discusses how the camera sees, and thus how camera angle, lens choice, and perspective all affect the appearance of your subject. Lindsay then covers things that ruin a pose—such as placement of the hands, and your subject's expression and posture. Next, Lindsay dives into "posing essentials," outlining her approach to start with a "base pose," then build on that to create endless posing opportunities. She also discusses posing the face—with specific sections dedicated to the chin, jaw, eyes, and forehead—as well as posing hands. In the second half of the book, Lindsay dedicates entire chapters to posing specific subject matter: women, men, couples, curvy women, families and small groups, and large groups. In each chapter, Lindsay addresses that subject matter's specific challenges, provides "go-to poses" you can always use, and covers how to train the eye to determine the best pose for your subject(s). Lindsay also teaches you how to analyze a pose so that you can create endless posing opportunities and continuously improve your work.

The stakes are higher than ever in this long-awaited finale of the Brimstone Angels series, starring tiefling heroine Farideh An epic battle of good versus evil has erupted—one that is rife with deception and intrigue, and where the question is as much who is evil, as how they can be defeated. The stakes have never been higher. The fallout will shake the Hells, and through them, the Forgotten Realms. Before Farideh took a devil's pact, before she was Chosen by the god-king of the Hells—before any of this started—there was Bryseis Kakistos, the original Brimstone Angel and the first of Farideh's line. Now in these final moments, Bryseis Kakistos is back. But this time around, she will not help the king of Hells achieve godhood—instead, she's going to kill him. All she needs is a little help from Farideh. By all accounts, Farideh should be happy to come to Bryseis' aid. After all, who could object to killing the king of Hells? But things are far more complicated than they seem, and Farideh may not be as willing as Bryseis thinks. . . . The Devil You Know is the sixth book in the Brimstone Angels series.

First printed in 1702, this eyewitness account of the Salem Village witchcraft trials, and the events leading up to them, was written by Reverend John Hale, who concludes that it was Satan, not the witches, who used the manipulation of objects to afflict others.
