This book has been written with the intention of providing an up-to-the minute review of acute coronary syndromes. Atherosclerotic coronary disease is still a leading cause of death within developed countries and not surprisingly, is significantly rising in others. Over the past decade the treatment of these syndromes has changed dramatically. The introduction of novel therapies has impacted the outcomes and surviving rates in such a way that the medical community need to be up to date almost on a "daily bases". It is hoped that this book will provide a timely update on acute coronary syndromes and prove to be an invaluable resource for practitioners seeking new and innovative ways to deliver the best possible care to their patients.

* A broad range of disciplines--energy conservation and air quality issues, construction and design, and the manufacture of temperature-sensitive products and materials--is covered in this comprehensive handbook * Provide essential, up-to-date HVAC data, codes, standards, and guidelines, all conveniently located in one volume * A definitive reference source on the design, selection and operation of A/C and refrigeration systems

Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA's flight directors, who authored the book. The book provides insight into the vast amount of time and energy that these teams devote to the development, planning and integration of a mission before it is executed. The passion and attention to detail of the flight control team members, who are always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. With tremendous support from the ISS program office and engineering community, the flight control team has made the International Space Station and the programs before it a success.

Just days after the Germans surrendered at Stalingrad, legendary Red Army sniper Vasily Zaytsev described the horrors he witnessed during the five-month long conflict: "one sees the young girls, the children who hang from trees in the park... I have unsteady nerves and I'm constantly shaking." He was being interviewed, along with 214 other men and women—soldiers, officers, civilians, administrative staffers and others—amidst the rubble that remained of Stalingrad by members of Moscow's Historical Commission. Sent by the Kremlin, their aim was to record a comprehensive, historical documentary of the tremendous hardships overcome and heroic triumphs achieved during the battle. 20 soldiers of the 38th Rifle Division vividly recount how they stumbled upon the commander of the German troops, Field Marshal Friederich Paulus, defeated and hiding in a bed that reeked like a latrine. A lieutenant colonel remembers the brave 20 year-old adjutant who wrapped his arms around his commander's body to protect him from a flying grenade. Working around the clock, Nurse Vera Gurova describes a 24 hour period during which her hospital received over than 600 wounded men – equivalent to one every two and an half minutes. Countless soldiers endured shrapnel wounds and received blood transfusions in the trenches, but she can't forget the young amputee who begged her to avenge his suffering at Stalingrad. This harrowing montage of distinct voices was so candid that the Kremlin forbade its publication and consigned the bulk of these documents to a Moscow archive where they remained forgotten for decades, until now. Jochen Hellbeck's Stalingrad is a definitive portrait of perhaps the greatest urban battle of the Second World War—a pivotal moment in the course of the war re-created with absolute candor and chilling veracity by the voices of the men and women who fought there.
