One of America's top allergy doctors offers a revolutionary, full-body approach to diagnosing, preventing, and treating allergies—in many cases, for good. Millions of Americans currently suffer from allergies, and the rate is growing. Climate change, globalization, air pollution, and oversanitization of the environment in the early years of life are just a few of the causes that, taken together, have introduced new allergens into our environment that are wreaking havoc and causing needless suffering. This “new allergen marketplace” requires a new allergy solution. According to Dr. Clifford W. Bassett, traditional remedies focus on treating symptoms but leave allergy sufferers vulnerable to continued bouts of misery. Dr. Bassett argues that when we consider a person's genetics, environment, and overall health, we can more effectively identify—and take appropriate action to forestall—symptoms before they even begin. For the first time, Dr. Bassett presents the unique, integrative approach he's used in his Manhattan offices for two decades to vanquish allergy symptoms for countless individuals. In addition to explaining what allergy is (and isn't) and identifying key triggers—from nuts to gluten to the nickel commonly used in cell phones—Dr. Bassett offers both medical and nonmedical alternatives to treatment, and specific, proactive steps to protect against common allergens. Allergens are here to stay, but with The New Allergy Solution, your life need no longer be ruled and ruined by allergy. The New Allergy Solution strives to enhance your well-being through strategies for a greater sense of control, giving you more freedom to do what you love.

This is an incredibly moving account of tragedy and its aftermath, as told by Gill Hicks, survivor of the London bombings in July 2005. Gill was the last person to be pulled alive from the wreckage of the tube train at Russell Square underground station. Unidentifiable on arrival in hospital, having sustained horrific injuries which led to both of her legs being amputated, Gill was labelled as "One Unknown" on her wristband and life hung in the balance for several days. She was saved by the dedication of the medical staff treating her, and by her own single-minded will to survive. This is, quite simply, a wonderful book. It is humbling, uplifting, funny and deeply moving, and it contains a message of great, yet quiet power. Gill writes with honesty, humour and courage. One Unknown is a call to us all to strive for a more tolerant and peaceful world. This paperback edition contains a new foreword - three years after the bombings - plus a new chapter written by Gill's husband, giving his account of the events of the past three years.

HVAC Training 101 is a site visited by over 100,000 enthusiasts monthly, who are interested in becoming HVAC technicians. The site initially began as the passion project of a retired HVAC technician. The site quickly gained popularity, building a strong community of aspiring HVAC technicians. Currently, it is managed by a team of ex-HVAC technicians with decades of experience in the industry. Head over to HVACTraining101.Com to learn more. We began by writing about how to become certified as an HVAC technician. With rules and certifications varying for each state, it was a challenging task. We had a few friends in other states help us out, but for some states, we had to dig really deep to find the information needed. Our audience at the time was very happy with the information we provided. At this point, we started getting many questions about EPA 608 certification. Once you get the education and experience needed to become a technician, prospective employers will ask for certification to handle refrigerants. When we started writing about how to become certified, viewers again requested we write a study guide to help them prepare for the 608 exams. The study guides out there were dense and had much more information than was needed to pass the test. This inspired us to embark on a journey to write the simplest study guide for the EPA 608 exam, which would still cover all the necessary information. We hope we have achieved our intended objective. The journey to becoming an HVAC technician can be long and arduous. We congratulate you on taking this path and wish you the best in cracking the EPA 608 exam.

Jelly is as surprised as anyone when he decides that he's going to win the annual sixth grade speech contest. Just like that, Joe Alton Miles, better known as Jelly (because his initials are J.A.M. and his best friend's are P.B.), is faced with overcoming not only his terror of being in the spotlight, but also the wrath of smart, popular Victoria, who believes that the prize (like all prizes) is rightfully hers. At first, Jelly only cares about winning the awesome prize (a new tablet), but as Victoria escalates her campaign against him, Jelly begins to realize that it's not only the prize that's at stake, but also his reputation, his self-respect and the friendship he values most. Jelly must dig deep inside himself to find out if he's strong enough to stand up to Victoria and show everyone what he's really capable of. Hilariously funny and just
