As the EPA-designated reference laboratory for NY State, the Environmental Biology Laboratory analyzes water samples submitted by state agencies and local health departments for organisms indicative of fecal pollution (thermotolerant coliforms, E. coli, enterococci) and overall water quality (heterotrophic bacteria, total coliforms). Analysis/Tests Routinely Performed *Total coliforms ...

For the two-semester A&P laboratory course. Fully engage students in their A&P Lab experience Human Anatomy & Physiology Laboratory Manual: Making Connections distinguishes itself from other A&P lab manuals by focusing on and addressing the most common teaching challenges in the lab--getting students to engage in the lab, to prepare for the lab, and to apply concepts in the lab. Catharine Whiting's active learning approach incorporates a rich variety of hands-on activities and guided questions to get students engaged and asking questions. The 2nd Edition provides new features, such as "What You Need to Know Before You Start this Unit" at the beginning of each Unit and new Pre-Lab Video Coaching Activities to help students learn what they need to review before lab. Developed as the companion to Erin Amerman's Human Anatomy & Physiology, 2nd Edition, Whiting's lab manual reflects the same superb art program and terminology found in the Amerman textbook. Human Anatomy & Physiology Laboratory Manual: Making Connections, 2nd Edition is available in three versions for your students: Main, Cat and Fetal Pig. The Cat and Fetal Pig versions are identical to the Main version except that they include seven additional cat dissection and nine additional fetal pig dissection exercises, respectively, at the back of the lab manual. Also available with Mastering A&P Mastering(tm) is the teaching and learning platform that empowers you to reach every student. By combining trusted author content with digital tools developed to engage students and emulate the office-hour experience, Mastering personalizes learning and improves results for each student. Mastering A&P assignments support interactive features in the lab manual and include new Pre-Lab Video coaching activities, new Cat Dissection Video and Fetal Pig Dissection Video coaching activities, new fully mobile PAL 3.1 plus PAL 3.1 Customizable Flashcards, Learning Catalytics (tm) , A&P Flix 3D muscle animations, a variety of Art Labeling Questions, Clinical Application Questions, and more. Note: You are purchasing a standalone product; Mastering A&P does not come packaged with this content. Students, if interested in purchasing this title with Mastering A&P, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. Preparing for the New York State biology Regents - Living Environment exam has never been easier, more enticing, more exciting, more engaging, more understandable, and less overwhelming. Our book is written to help students do more, know more, and build confidence for a higher mark on their Regents exam. With questions for five Regents exams, including two most recent actual exams, this book can be used as a primary Regents question practice resource or as a supplementary resource to other prep books. Book Summary: Organized, engaging, doable, quick-practice quality Regents question sets. Clear, brief, simple, and easy-to-understand correct answer explanations. Do more, know more, and build confidence for a higher mark on your Regents exam. Keep track of your day-to-day progress, improvement and readiness for your Regents exam. Actual Regents exams included, with answers and scoring scales. Glossary of must-know biology Regents vocabulary terms.

This review book provides a complete review of a one-year biology course that meets the NYS Living Environment Core Curriculum. Includes four recent Regents exams.

In one of the few book-length studies of a major post-secondary writing-across-the-curriculum initiative from concept to implementation, Writing-Intensive traces the process of preparation for new writing requirements across the undergraduate curriculum at Simon Fraser University, a mid-sized Canadian research university. As faculty members across campus were selected to pilot writing-intensive courses, and as administrators and committees adjusted the process toward full implementation, planners grounded their pedagogy in genre theory—a new approach for many non-composition faculty. So doing, the initiative aimed to establish a coherent yet rhetorically flexible framework through which students might improve their writing in all disciplines. Wendy Strachan documents this campus cultural transformation, exploring successes and impasses with equal interest. The study identifies factors to be considered to avoid isolating the teaching of writing in writing-intensive courses; to engender a university-wide culture that naturalizes writing as a vital part of learning across all disciplines; and to keep the teaching of writing organic and reflected upon in a scholarly manner across campus. A valuable case history for scholars in writing studies, WAC/WID, and curricular change studies.

This text is a modern rhetoric/reader which integrates reading and writing concerns, provides high interest reading selections across a variety of themes, includes a diversity of authors, cultures, and life experiences, and builds a framework for study and practice which is pedagogically sound and flexible.

Effective science teaching requires creativity, imagination, and innovation. In light of concerns about American science literacy, scientists and educators have struggled to teach this discipline more effectively. Science Teaching Reconsidered provides undergraduate science educators with a path to understanding students, accommodating their individual differences, and helping them grasp the methods--and the wonder--of science. What impact does teaching style have? How do I plan a course curriculum? How do I make lectures, classes, and laboratories more effective? How can I tell what students are thinking? Why don't they understand? This handbook provides productive approaches to these and other questions. Written by scientists who are also educators, the handbook offers suggestions for having a greater impact in the classroom and provides resources for further research.

The Foundations of Remembering presents a collection of essays written by top memory scholars in honor of Henry L. Roediger III. The chapters were originally delivered as part of the "Roddyfest" conference held in March 2005 to celebrate Purdue University's awarding of an honorary doctor of letters to Roediger in recognition of his many contributions to the field of psychology. Authors were given a simple charge: choose your own topic, but place your work in historical context. Roediger is fascinated by the intellectual lineage of ideas, so addressing historical "foundations" seemed a fitting tribute. The Chapters contained in this volume help to establish the foundations of remembering, circa the first decade of the 21st century, as perceived by some of the leading memory researchers in the world. Not surprisingly, each of the chapters touches on Roediger's research as well, largely because his work has helped to define and clarify many topics of interest to the memory field. The Foundations of Remembering is intended for a wide audience: students, scholars, and anyone interested in exploring the historical and conceptual roots of modern memory theory.
