This book differs from other thermodynamics texts in its objective which is to provide engineers with the concepts, tools, and experience needed to solve practical real-world energy problems. The presentation integrates computer tools (e.g., EES) with thermodynamic

concepts to allow engineering students and practising engineers to solve problems they would otherwise not be able to solve. The use of examples, solved and explained in detail, and supported with property diagrams that are drawn to scale, is ubiquitous in this

textbook. The examples are not trivial, drill problems, but rather complex and timely real world problems that are of interest by themselves. As with the presentation, the solutions to these examples are complete and do not skip steps. Similarly the book includes

numerous end of chapter problems, both typeset and online. Most of these problems are more detailed than those found in other thermodynamics textbooks. The supplements include complete solutions to all exercises, software downloads, and additional content on

selected topics. These are available at the book web site www.cambridge.org/KleinandNellis.

Bala dreams of making Tamil films and directing his favourite actor Rajnikanth ? a dream that leads him naturally to study engineering in college. This earns him his father's approval and the opportunity to export himself to America. As Director of Design at Flexit Inc.,

thinking up new ways to help Americans shed the excess weight around their middles and in their wallets, he is at least some kind of director. Bala loves America, and America it seems loves him even more. He has everything he needs to be happy: a green card, a

satellite dish to watch cricket and a companion to share his home ? albeit one with a very limited vocabulary. But he is now less than a year away from the big 30, and if he doesn't act fast he might have to settle for whichever bride his Amma chooses. So begins Bala's

quest for romance as he meets both American and Indian women. Some who are too old, others too young, and yet others just too stuck up. Will he ever find someone just right for him ? and good enough to inherit his mother's Corelle dishes?
