 sequence. The fifth term is 2012 so what is the maximum possible value of the first term? Let . x . be the value of the first term and . y . be the value of the second term. We can then think of our sequence as: x, y, x + y, x + 2. y. and 2. x + 3. y. From this we have 2. x + 3. y = 2012, and we want the maximum possible integer value for . x , the first term. Therefore, we would like . y
