New Clinical Genetics 2nd Edition  
The second edition of New Clinical Genetics has been comprehensively updated, but the unique structure and format of the first edition have been retained. New cases have been introduced covering Fragile X and the identification of an underlying chromosome problem by SNP chip analysis. While many of the basic scientific principles remain, much new material has been added:

clinical genetics. This is the second edition of this book, published first in 2007. It is the product of the joint efforts of a molecular geneticist, Professor Andrew Read, and a clinical geneticist, Professor Dian Donnai, both from the University of Manchester. As mentioned in the preface of the first edition, the 'primary audience for this book is medical students', but it is hoped that 'it will also be useful for counsellors and scientists, and indeed established clinicians, who ...
