The laboratory manual and study guide supports your teaching with a broad range of practicals, emphasising safety and risk assessment. It is an essential companion to Chemistry in Context and can also be used alongside other Advanced Chemistry books. It offers practicals with detailed instructions, for openended investigations and opportunities for assessed practical work in the four skill areas of planning, implementing, analysing and evaluating.

This manual is designed to serve as a sourcebook for plant managers & engineers who must find workable solutions to water quality related problems. Specific water quality & treatment requirements are examined for a variety of industrial processes, including metal-plating, laundering, food preparation, mirror silvering, television tube production, photography, textile manufacturing, paper manufacturing &
