More and more businesses today have their receive phone service through Internet instead of local phone company lines. Many businesses are also using their internal local and wide-area network infrastructure to replace legacy enterprise telephone networks. This migration to a single network carrying voice and data is called convergence, and it's revolutionizing the world of telecommunications by slashing costs and empowering users. The technology of families driving

this convergence is called VoIP, or Voice over IP. VoIP has advanced Internet-based telephony to a viable solution, piquing the interest of companies small and large. The primary reason for migrating to VoIP is cost, as it equalizes the costs of long distance calls, local calls, and e-mails to fractions of a penny per use. But the real enterprise turn-on is how VoIP empowers businesses to mold and customize telecom and datacom solutions using a single, cohesive networking platform. These business drivers are so compelling that legacy telephony is going the way of the dinosaur, yielding to Voice over IP as the dominant enterprise communications paradigm. Developed from real-world experience by a senior

The "director's cut" edition of the sprawling super-hero epic from Love and Rockets. Originally serialized in Love and Rockets New Stories, "Ti-Girls Adventures" managed to be both a rollickingly creative super-hero joyride (featuring three separate super-teams and over two dozen characters) that ranged from the other side of the universe to Maggie's shabby apartment, and a genuinely dramatic fable about madness, grief, and motherhood as Penny Century's decades-long quest to become a genuine

In addition to introducing a plethora of wild new characters, God and Science brings in many older characters from Jaime's universe, some from seemingly throwaway shorter strips and some from Maggie's day-to-day world (including some real surprises). The main heroine of the story, forming a bridge between the "realistic" Maggie stories and the super-heroic extravaganza is "Angel," Maggie's sweet-tempered and athletic new roommate and best friend, and now herself an aspiring super-heroine.
