while their animation tools become ever more complex and specialized. The second edition of Rick Parent's Computer Animation is an excellent resource for the designers who must meet this challenge. The first edition established its reputation as the best technically oriented animation text. This new edition focuses on the many recent developments in animation technology, including fluid animation, human figure animation, and soft body animation. The new edition revises and expands coverage of topics such as quaternions, natural phenomenon, facial animation, and inverse

Standing as the only text focused on the pharmaceutical treatment of asthma, this reference details the pharmacology, mechanisms of action, efficacy, and safety of every drug currently used in the management and care of asthma patients.

Internationally renowned authorities cover published practice guidelines, treatment plans, pharmacologic agents, and clinical studies to provide the most authoritative and up-to-date information on the use of medications to control and prevent this

the role of pharmacotherapy in the overall management of asthma, this guide: *

- * reviews the pharmacology and clinical use of inhaled corticosteroids, beta adrenergic agonists, leukotriene modifiers, combination products, and many other asthma drugs
- * provides a practical framework for the optimal pharmacotherapy of asthma, focusing on outpatient therapy
- * examines international guidelines for the drug treatment of asthma.
