everyone thinks they can be the manager. But how do you manage outrageous talent? What do you do to inspire loyalty from your players? How do you turn around a team in crisis? What's the best way to build long-term success? How can you lead calmly under pressure? The issues are the same whether you're managing a Premier League football team or a FTSE 100 company. Here, for the first time, some 30 of the biggest names in football management reveal just what it takes. With their every act, remark, and success or failure under constant scrutiny from the media and the fans, these managers

Columbine High School in Colorado, school shootings are a new and alarming epidemic. While sociologists have attributed the trigger of violence to peer pressure, such as bullying and social isolation, prominent psychologist Peter Langman, argues here that psychological causes are responsible. Drawing on 20 years of clinical experience, Langman offers surprising reasons for why some teens become violent. Langman divides shooters into three categories, and he discusses the role of personality, trauma, and psychosis among school shooters. From examining the material evidence of notorious school shooters at

Columbine and Virginia Tech to addressing the mental states of the violent youths he treats, Langman shows how to identify early signs of homicide-prone youth and what preventive measures educators, parents and communities can take to protect themselves from the tragedy.

Now with a new chapter that focuses on what great bosses really do. Dr. Sutton reveals new insights that he's learned since the writing of Good Boss, Bad Boss. Sutton adds revelatory thoughts about such legendary bosses as Ed Catmull, Steve Jobs, A.G.

Lafley, and many more, and how you can implement their techniques. If you are a boss who wants to do great work, what can you do about it? Good Boss, Bad Boss is devoted to answering that question. Stanford Professor Robert Sutton weaves together the best psychological and management research with compelling stories and cases to reveal the mindset and moves of the best (and worst) bosses. This book was inspired by the deluge of emails, research, phone calls, and conversations that Dr. Sutton experienced after publishing his blockbuster bestseller The No Asshole Rule. He realized that most of

these stories and studies swirled around a central figure in every workplace: THE BOSS. These heart-breaking, inspiring, and sometimes funny stories taught Sutton that most bosses - and their followers - wanted a lot more than just a jerk-free workplace. They aspired to become (or work for) an all-around great boss, somebody with the skill and grit to inspire superior work, commitment, and dignity among their charges. As Dr. Sutton digs into the nitty-gritty of what the best (and worst) bosses do, a theme runs throughout Good Boss, Bad Boss - which brings together the diverse lessons and is a

hallmark of great bosses: They work doggedly to "stay in tune" with how their followers (and superiors, peers, and customers too) react to what they say and do. The best bosses are acutely aware that their success depends on having the self-awareness to control their moods and moves, to accurately interpret their impact on others, and to make adjustments on the fly that continuously spark effort, dignity, and pride among their people.

takes a look at the antics, behaviors, and idiosyncrasies of wild birds from the viewpoint of a professional wildlife biologist and award-winning wildlife photographer. Titlow understands the often wild and wacky lives of birders--those who are always ready and willing to drop everything at a moment's notice and "twitch off" to some exotic locations just to add another checkmark to their life lists. His engaging stories, complemented by vivid images, provide a fascinating compendium of wild bird lore perfectly suited to the 65-million-plus birders across the United

innovative treatments to reactivate the mind's abilities to trust, engage others, and experience pleasure--

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*.

Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants

a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results: • The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients • The home-organizing guru who developed a simple

technique for overcoming the dread of housekeeping • The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. Switch shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your

Carlo Ancelotti is one of the greatest managers of all time, with five Champions League titles to his name. Yet his approach could not be further from the aggressive theatricals favoured by many of his rivals. His understated style has earned him the fierce loyalty of players like David Beckham, Zlatan Ibrahimovic and Cristiano Ronaldo. In *Quiet Leadership*, Ancelotti reveals the full, riveting story of his managerial career - his methods, mentors, mistakes and triumphs - and takes us inside the dressing room to trace

Each of these animals tells us something interesting about the way they perceive and manipulate their world. The article also looks at what scientists are learning about the intelligence of dolphins and crows, beyond mere communication. In “Almost Human,” Mary Roach takes us to the savannahs of Senegal to meet a group of 34 chimpanzees, whose behavior and social structures have given scientists some important clues about the nature of their communication and intelligence. In “The Genius of Swarms,” Peter Miller looks at the collective behavior of ants, bees, and other insects for what
