specific topics.

On the 75th anniversary of the atomic bombings of Hiroshima and Nagasaki comes this heart-pounding account of the war-room drama inside the cabinets of the United States and Japan that led to Armageddon on August 6, 1945. Here are the secret strategy sessions, fierce debates, looming assassinations, and planned invasions that resulted in history's first use of nuclear weapons in combat, and the ensuing chaotic days as the Japanese government struggled to respond to the reality of nuclear war. During the closing months of World War II, as America's strategic bombing campaign incinerated Japan's cities, two military giants locked in a death embrace of cultural differences and diplomatic intransigence. The leaders of the United States called for the "unconditional surrender" of the Japanese Empire while developing history's deadliest weapon and weighing an invasion, Downfall, that would have dwarfed D-Day. Their enemy responded with a last-ditch plan termed Ketsu-Go, which called for the suicidal resistance of every able-bodied man and woman in "The Decisive Battle" for the homeland. But had Emperor Hirohito's generals miscalculated how far the Americans had come in developing the atomic bomb? How close did President Harry Truman come to ordering the invasion of Japan? Within the Japanese Supreme Council at the Direction of War, a.k.a. "The Big Six," Foreign Minister Shigenori Tōgō risked assassination in his crusade to convince his dysfunctional government, dominated by militarist fanatics, to save his country from annihilation. Despite Allied warnings of Japan's "prompt and utter destruction" and that the Allies would "brook no delay," the Big Six remained defiant. They refused to surrender even after the atomic bombings of Hiroshima and Nagasaki. How did Japanese leaders come to this impasse? The answers lie in this nearly day-by-day account of the struggle to end

the most destructive conflict in history.

Wist je dat zandbijen experts zijn in graven? En koekoeksbijen hun eitje in het nest van een andere bij leggen? Lees van alles over soorten bijen, hoe ze leven en hun rol bij de bestuiving. En wat je zelf kunt doen! Met doetips en grote kleurrijke illustraties van 40 tekenaars. Vanaf ca. 9 t/m 12 jaar.

The Ruffhouse Records founder tells how he overcame poverty, abuse, and addiction to start a label that launched some of music's biggest stars: “ Gripping. ” —Philadelphia Magazine As a struggling musician trying to catch a break in 1980s Philadelphia, Chris Schwartz navigated the crime-infested, morally bankrupt music industry to found and build one of the most successful hip-hop record labels in the world. That label was Ruffhouse, which launched the careers of Nas, The Fugees, Cypress Hill, and others, dominating the charts and generating global revenues of over a billion dollars. Schwartz and his partner, Joe Nicolo, built Ruffhouse from one desk and a phone to one of hip-hop's most revered record companies while simultaneously struggling with drug addiction and alcoholism. A story of money, greed, envy, betrayal, violence, addiction, loss, and redemption, not to mention a whole lot of music, Ruffhouse reveals the inside story of the record companies, recording studios, tour buses, private jets, mansions, radio stations, and concert halls at the height of hip-hop's 1990s heyday while also uncovering the darker side of the business, from police stations to rehab clinics, courtrooms to prisons. Told in Schwartz's own candid, searing prose, Ruffhouse is a portrayal of hip-hop culture at its tipping point, as it transitioned from urban curiosity to global phenomenon. “ [A] story of adversity and perseverance...Fans of these artists will love the insider information on the recording process and the trials and tribulations of getting this music out into the world. ” Library Journal “ All respect to Chris Schwartz. He is a great visionary. ” —Nas

Readers interested in modeling a realistic railroad of the 1950s will love this book based on a special 2005 issue of *Model Railroader*. This book provides historical information and photos covering locomotives, passenger equipment, freight cars, and trackside details. Featured layouts in a variety of scales show how to model Chicagos Dearborn Station, move coal in the Appalachians, carry produce, and recreate Los Angeles of the 1950s.

Award-winning food critic and writer William Sitwell chronicles the fascinating global history of eating out, from the Roman wine taverns of ancient Pompeii to today ' s high-tech molecular gastronomy. Have you ever wondered where the first coffee shop sprung up, or when the sushi conveyor belt was invented? Unbelievably, the global history of the dining establishment has never been told—until now. Journeying 2,000 years into the past, acclaimed food critic and writer William Sitwell artfully traces the earliest origins of the widespread cultural practice of eating out, from its most basic to most sophisticated forms. Whether he ' s traversing the inns and taverns of Pompeii before its destruction in A.D. 79, witnessing the tumultuous emergence of fine dining during the French Revolution, or recounting the mid-twentieth-century invention of the taco machine in New York City, Sitwell ' s engaging prose gives readers a front-row seat of the restaurant experience across cultures and millennia. He follows the fashions that shape the way we dine, meeting the restaurateurs of today and yesterday whose establishments shaped society for good or ill. And after offering a wry history of the world through the prism of the eatery, he ponders its exciting future. Fully illustrated with color photographs and illustrations, chefs, critics, restauranteurs, and foodies alike will delight in all the sweet and savory details offered up in this lively and highly absorbing romp through social and
