chapters. The first section is dedicated to the realization of effective portfolio showcases and it will identify materials and techniques used to produce them. This chapter will also identify specific requirements by discipline including scenery, costumes, lighting and sound and will cover the different portfolio requirements to apply for graduate school, jobs in the field, professional organizations and for promotional purposes. The second section is dedicated to the development and use of digital portfolios and it will look at the different software used in this area. The third chapter is about presentation and marketing and it will describe how to develop personal presentation techniques, resume, business card, and web pages. Finally, the fourth section offers key information in regards to the maintenance and updating of portfolios. Each chapter will feature real samples from the professional field and a page of "do's

(Yamaha Products). Sound reinforcement is the use of audio amplification systems. This book is the first and only book of its kind to cover all aspects of designing and using such systems for public address and musical performance. The book features information on both the audio theory involved and the practical applications of that theory, explaining everything from microphones to loudspeakers. This revised edition features almost 40 new pages and is even easier to follow with the addition of an index and a simplified page and chapter numbering system. New topics covered include: MIDI, Synchronization, and an Appendix on Logarithms. 416 Pages.
