China Goes Global The Partial

In his book China Goes Global, the Partial Power, David Shambaugh, a China expert at George Washington University, acknowledges China's epochal metamorphosis from one of the poorest and, some would argue, insignificant countries in the world to one of the wealthiest. He calls this transformation, as many have before him, the "big story of our time."

China Goes Global: David Shambaugh, Mark Ashby ...

China Goes Global: The Partial Power, by David Shambaugh, OUP USA, £20/\$29.95, 320 pages. Today's debate about the future of global order is marked by a near-certainty that China's economy will overtake that of the United States within the next decade.

In his book China Goes Global, the Partial Power, David Shambaugh, a China expert at George Washington University, acknowledges China's epochal metamorphosis from one of the poorest and, some would argue, insignificant countries in the world to one of the wealthiest.

China Goes Global: The Partial Power - Kindle edition by ...

China has gone global, but most China experts in the American academic community have gone local, moving in the opposite direction. As Shambaugh has observed rightly, 'big picture' books on China in the United States have been written by virtually anyone but China scholars. A crucial reason for this academic trend is the current obsession with theories and methods in the social sciences departments, which has changed the incentive structure for scholars who compete for employment ...

China Goes Global: The Partial Power | International ...

China's global impact is increasingly felt on every continent, in most international institutions, and on many global issues. By many measures, China is now clearly the world's second leading power, after the United States, and its aggregate economy is due to surpass that of the United States sometime around 2025.

China Goes Global: The Partial Power | David Shambaugh ...

In China Goes Global, eminent China scholar David Shambaugh delivers the book that many have been waiting for—a sweeping account of China's growing prominence on the international stage. Thirty years ago, China's role in global affairs beyond its immediate East Asian periphery was decidedly minor and it had little geostrategic power.

China Goes Global: The Partial Power | David Shambaugh ...

Thirty years ago, China's role in global affairs beyond its immediate East Asian periphery was decidedly minor and it had little geostrategic power.

China Goes Global: The Partial Power eBook by David ...

Wherever one turns, China is in the news – gobbling up resources, soaking up investment, expanding its overseas footprint, asserting itself in its Asian neighborhood, being the sought-after suitor in global governance diplomacy, sailing its navy into new waters, broadening its global media exposure and cultural presence, and managing a mega-economy that is the engine of global growth. China's global impact is increasingly felt on every continent, in most international institutions, and ...

China Goes Global: The Partial Power | YaleGlobal Online

This book makes a persuasive case that China wants to concentrate on economic development at home, but is now deeply integrated into the global economy – and should reinforce confidence that Beijing's emergence on the global stage may be bumpy, but remain largely peaceful. For an excerpt from China Goes Global: The Partial Superpower click here.

China Goes Global: The Partial Superpower | YaleGlobal Online

In China Goes Global, he proposes and defends the hypothesis that China is an increasingly important global player, but is only a partial power. The book provides a thorough overview of China's dynamic position in the global order and is a welcome perspective-setter for those in the scholarly community who have perhaps ventured too deep into testing social science theories and lost sight of the bigger picture.

Book Review: China Goes Global: The Partial Power by David ...

China Goes Global: The Partial Power by David Shambaugh, Oxford University Press, 2013, 410 pp. No one appears to doubt that China is becoming an important international actor—its investments seem to trickle down to every corner of the world, and its outreach has already started to shift established frameworks of global affairs.

China Goes Global: The Partial Power > Air University (AU) ...

Most global citizens are well aware of the explosive growth of the Chinese economy. Indeed, China has famously become the workshop of the world. Yet, while China watchers have shed much light on the country's internal dynamics--China's politics, its vast social changes, and its economic development--few have focused on how this increasingly powerful nation has become more active and assertive throughout the world.

China Goes Global - Hardcover - David Shambaugh - Oxford ...

China Goes Global ranges across disciplines and perspectives, and Shambaugh's conclusion – that China is a work in progress, with more potential danger lying in its own internal confusion and lack of cohesion than from any great threat posed to the world by its imperialist designs – is well supported.

China clearly faces enormous challenges, unlike the United States a century ago. China's way to the top will thus be far more difficult and less predictable. And yet, paradoxically, China Goes Global provides simply too many statistics in favor of China's dominance to agree that it is only a partial power.
