Company history. In 1905, Continental Motors was born with the introduction of a four-cylinder, four stroke cycle L-head engine operated by a single camshaft . In August 1929, the Continental Motors Company formed the Continental Aircraft Engine Company as a subsidiary to develop and produce its aircraft engines. Continental Motors entered into the production of automobiles rather indirectly.

Continental Motors Company - Wikipedia

How to torque down head gasket on F162 and F163

The simplicity, lightness, compactness and reliability might seem ideal for an aero-engine, but because of their low efficiency, early flathead engines were deemed unsuitable. Two notable exceptions were the American Aeronca E-107 opposed twin aero engine of 1930 and the Continental A40 flat four of 1931, which became one of the most popular light aircraft engines of the 1930s.

Flathead engine - Wikipedia

The four cylinder Continental industrial models began with the model F124 and became successively models F135, F140, F162 and F163. Each model number stands for its cubic inch displacement. The six cylinder Continental Red Seal engines began as the F186 and became progressively the F209, F218, F226, F227, F244, and F245.
