that econometrics is learnt the way it works in practice—that is, practical methods for solving questions in business and economics, based on a solid understanding of the underlying methods. In this way the reader gets trained to make the proper decisions in econometric modelling. This book has grown out of half a century of

Econometric Methods with Applications in Business and ...

A complete reading of this book would give you a very strong knowledge of Modern Econometrics: you can learn what an applied macro or microeconomist would need and use. This is really a great "jump" from the last edition of Econometric Methods by J. Johnston (1984)(the one I use when I was an undergraduated student).

I draw on Johnston and DiNardo's (1997) *Econometric Methods*, and Professor Koenker's Lecture 7. I also provide additional support on testing for heteroscedasticity (see Appendix) and a starting point for those who want to explore further aspects of ARCH and GARCH process. This document is due to Roberto Perrelli ([click here](#)).
