**Nose Art Panel Reproductions**  
Of all the early operators of military aircraft, Germany was unusual in not using "round" roundels, but after evaluating several possible markings, including a black, red and white checkerboard, and a similarly coloured roundel, and black stripes, a black "iron" cross on a square white field was chosen as it was already in use on various flags, and to reflect Germany's heritage as the Holy Roman Empire.

**Military aircraft insignia - Wikipedia**  
"Since the first coats of drab-coloured dope were applied to the natural linen skinning of military aircraft in order that they would better blend with their backgrounds, and a need was first seen for some means of endowing aircraft with a national identity, the camouflage of aircraft has become a science and their decoration an art form."
