InterQual LOC criteria | Priority Health

InterQual® Behavioral Health Criteria support initial and continued stay level-of-care decisions across the behavioral health continuum of care. The criteria address the varying needs of geriatric, adult, adolescent, and child patients with both psychiatric and substance use disorders. The depth of criteria allows care managers to consider symptoms, functional status, and quality of support systems as determinants for the most appropriate level of care.

InterQual® Behavioral Health Criteria | Change Healthcare

When we receive a request for authorization or prior approval, our utilization review nurses use Change Healthcare's InterQual® criteria to determine if the services and level of care are clinically indicated. If the criteria are met, the case is approved; if the criteria are not met, the case is reviewed by a physician.

InterQual Level of Care Criteria 2009. (2009) Newton, MA: McKesson Corporation. Hospitalization Status Guidelines for Cellulitis. Most patients with Cellulitis should be placed in Observation, and will not qualify for Full Admission Status, unless. • at least ONE criteria for Severity of Illness.

Hospitalization Status Guidelines for Cellulitis

CMS does not mention InterQual or any other level of care criteria in either definition. Hospitals frequently use level of care criteria as an objective tool to help make decisions regarding whether an individual's condition is severe enough, or the services provided are intense enough, to be admitted to a specific level of care.
