Introduction To Probability And Its

Probability is the branch of mathematics concerning numerical descriptions of how likely an event is to occur or how likely it is that a proposition is true. The probability of an event is a number between 0 and 1, where, roughly speaking, 0 indicates impossibility of the event and 1 indicates certainty.

Probability - Wikipedia

Probability = (Number of a Favourable outcome) / (Total number of outcomes) $P = n(E) / n(S)$ Where P is the probability, E is the event and S is the sample space. Now, let's look at some very common examples. Example 1: Probability of getting an even number on rolling a dice once.
