IPSEC VPN Fundamentals | Virtual Private Network ...

Stateless IPsec HA Stateless IPsec HA describes a situation in which a IPsec VPN tunnel is terminated on a virtual interface using HSRP and VRRP, but no state is communicated between the redundant IPsec VPN gateways in the HSRP group that are serving as the physical points of termination for the IPsec VPN tunnel. This method of box-level tunnel termination redundancy involves a teardown of the IPsec VPN tunnel itself using IKE keepalives when a failure occurs on the active HSRP router (IPsec ...

Basic IPsec VPN topologies and configurations - from IPsec ...

This is when a client device such as a PC, tablet, or smartphone connects to a remote network over the Internet. Once a user initiates a connection to a remote network, that user must authenticate before specific network access is granted. Remote-access VPN is great for users who work from home or travel because the connections are dynamic on the client side, meaning the client device can be located with different IP addresses anywhere on the internet.

A Guide To VPN Basics | Network Computing

IPsec VPNs encrypt data at the Layer 3 IP packet layer, offering a comprehensively secure VPN solution through providing data authentication, anti-replay protection, data confidentiality, and data integrity protection. As such, IPsec is one of the most widespread VPN technologies in today's enterprise, service provider, and government networks.
