Palliative Care - UW Department of Family Medicine

By Family Caregiver Alliance and reviewed by Helene Martel, MA. Palliative care, also increasingly known as Supportive Care, may be one of the most misunderstood terms in healthcare. Many people believe it's the same as hospice care and it means the end of life. But palliative care is different from hospice, and when put in place, palliative care can bring hope, control, and a chance at a better quality of life for seriously ill patients and their caregivers.

Understanding Palliative/Supportive Care: What Every ...

- Palliative care is patient and family centered care.
- The illness affects both patient and family, and patient and family characteristics affect the illness.
- Geographic and cultural factors influence who is considered as family and what is expected from them in the setting of illness.

Supporting Families in Palliative Care - Oxford Medicine

A palliative care consultation team is a multidisciplinary team that works with the patient, family, and the patient's other doctors to provide medical, social, emotional, and practical support. The team is made of palliative care specialist doctors and nurses, and includes others such as social workers, nutritionists, and chaplains.
