## Sharepoint Document Id Not Generated

In a scenario where we have many document Content Types, we may want to enable Document ID - aka "Permanent Links" - which is a feature in SharePoint that assigns a specific ID for each document. That ID never changes even if the document is renamed or moved to another location. In this scenario, the Document ID field was being generated for some libraries/content types, but not others, which is a surprisingly common problem.

## #SharePoint | Document ID not being generated

When you go to the site collection and then view a document in a document library, the document IDs aren't assigned, and the document ID column isn't displayed as a column in a view. Solution To enable the Document ID Service feature on a site collection that's subscribed to the content type hub, you must first enable the Document ID Service feature on the content type hub site collection.

Skip down to the Summary section and I'll tell you what I found. Setup. Once the Document ID feature is activated, a new Site Collection setting will appear called Document ID settings (image). This setting allows you to enter a prefix (up to 12 characters) to customize your Document IDs and optionally reset all document IDs in the site ...

### **SharePoint Online and Document ID. The Goods. - Joanne C Klein**

When I right-click a document and choose 'Get link' the link generated uses the document's unique ID. This means that if the document is moved or renamed, the link still works - great! However, there are two scenarios where the behaviour is different: In Outlook, if I insert the same document by going to 'Attach File > Browse Web Locations > ...' the link that's inserted into my email uses the document's path. So now the link will no longer work if the file is moved or renamed.

### **Document IDs - Microsoft Tech Community - 7003**

Document IDs are generated every time an item is added, and existing IDs are overwritten by default unless the item that was created specifically instructs SharePoint Server 2010 not to overwrite its existing ID. During move operations, SharePoint Server 2010 keeps the document ID.
