Specialization,  
Speciation, and  
Radiation is unified by  
the idea that  
understanding the  
ecological framework  
of the interactions  
between herbivorous  
insects and their host  
plants is fundamental  
to understanding their  
evolution.

**Speciation: Books**

In each case, the radiation events are only a few million years old, making the high level of speciation particularly remarkable. [8] [7] [6]

Several factors could be responsible for this diversity: the availability of a multitude of niches probably favored specialization, as few other fish taxa are
