This guide will provide a basic understanding

of how to use the Synchro 8 software package. This guide was designed to walk a user through the necessary steps to create a network simulation from opening the software for the first time to the printing the traffic analysis reports.

Getting Started: Synchro 8

Synchro and SimTraffic queue lengths can be

quite different. See Version 7 user guide page 23-13 and 7-27. For studies, typically use SimTraffic 95th percentile length or SimTraffic maximum length, whichever is shorter, rounded to 25ft increment. However, use Synchro (not SimTraffic) queue lengths for unsignalized divided highway intersections.

Using Synchro Studio, traffic professionals can easily analyze capacity and timing optimization as well as simulate, check and fine-tune traffic signal operations. With Warrants 9, the user can check the need for a traffic signal based on user input traffic volumes.
