Tektronix 2235: Tektronix 2235 ensures measurement quality and reliability while reducing instrument cost. Tek started with the innovative architecture of the 2200 Series: fewer boards, fewer mechanical parts, less cabling and electrical connectors. This approach, plus advanced circuit design and a focus on essential features, has led to a scope that is more accurate, more reliable, lighter and more serviceable-and simpler to use-than any other 100 MHz scope.

I have many Tek service manuals, but not for this particular model. It would be great if I could troubleshoot from the manual of a slightly different model. Even advice would be helpful. The symptoms it displays are: Beam out of focus. Cannot sharpen, but does take some adjustment. Vertical adjustment does not work.
