In scientific terms, the 5-second rule proposes that if you quickly grab the dropped food from a contaminated surface, the microorganisms on that surface won't have time to transfer on to your food.

### **The 5-Second Rule for Food: Fact or Fiction?**

The five-second rule, sometimes also the ten-second rule, is a food hygiene myth that states that there is a defined window where it is permissible to pick up food (or sometimes cutlery) after it has been dropped and thus exposed to contamination. Some may believe this assertion, whereas most people employ the rule as an amusing social fiction that allows them to eat a dropped piece of food, despite the potential reservations of their peers.
