In 1666 the Great Fire of London destroyed much of the centre of London, but also helped to kill off some of the black rats and fleas that carried the plague bacillus. Bubonic Plague was known as the Black Death and had been known in England for centuries. It was a ghastly disease.

The Great Plague 1665 - the Black Death

THE PESTILENCE IN LONDON The City Infected, November 1348 THERE SEEMS little reason to doubt that Avesbury's date for the beginning of the nightmare was quite accurate. The making of wills suggests a significant increase at the very end of October: of the six wills drawn up in that month, four were dated to the last five days.

THE PESTILENCE IN LONDON - The Black Death in London

The Black Death is the name used to describe the plague epidemic that swept through Europe from 1348 to 1351. One of the most frightening Black Death facts is that it was extremely fatal and spread very quickly. Although the exact death toll can only be estimated based on what we know now, it is thought between 75 and 200 million people died.

The Black Death in London by Bernie Sloane, Paperback ...

The brutality of the Black Death was matched only by the speed of its rampage across medieval Europe. One third of the English population was wiped out. The feudal system - brought into existence nearly 300 years earlier under William I - was damaged, and the unquestioned belief in the supremacy of the Catholic Church was destroyed.

The Black Death in London | Barney Sloane | download

Robert S. Gottfried tells us that the Black Death arrived in London in late September 1348. London was England's largest town but was home to a mere 50,000 people crowded into a single, unsanitary square mile. The plague's toll was staggering in its dimensions: Scheduled to convene in Westminster in autumn 1349, Parliament never assembled.
