A juvenile offender does not become so suddenly, at the time of the commission of a crime. As a rule, the antisocial properties of his personality are formed gradually and long before the commission of a crime, which gives rise to a qualitative new socio-legal assessment of his personality as a juvenile offender.

Biological and Psychological Theories on Juvenile Offenders

Another study on juvenile sex offenders yielded significant results that watching pornography before and after the age of 10 was correlated with sexual offending in adolescents, compared to nonoffender adolescents who had not watched pornography before the age of 10 (Burton, Leibowitz, Booxbaum, & Howard, 2011).
